

**WORTHINGTON**  
INDUSTRIES

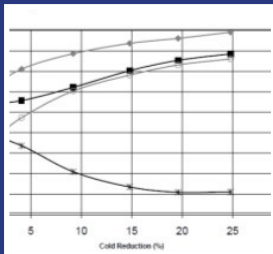

*Learn how our Material Support & Solutions team solved this customer material issue:*

## CUSTOM SURFACE

### THE PROBLEM:

The customer was in need of a U.S. source for an automotive part, needing to match surface finish only available in Europe.

### THE ANALYSIS:

Worked with the customer to match the European surface finish to ensure that the uniformity and consistency met statistical performance characteristics and customer specifications.

### THE SOLUTION:

Our experienced metallurgists evaluated the part characteristics and engineered a process to produce a statistically similar surface roughness and pattern that met this customer's need.

### THE ACTION:

*If you have unique surface requirements or trouble sourcing and need a supplier who will create a custom process for your part, contact the Material Support & Solutions team at Worthington.*
